PROFILE

Frontend Developer with **5 years of experience in Angular**. Specialized in building scalable, high-performance web applications using Angular, TypeScript, RxJS, HTML, and CSS/SCSS. Strong experience in developing reusable UI components and integrating REST APIs. Proven ability to optimize performance, enhance user experience, and deliver enterprise-grade SaaS products.

CORE SKILLS

Frontend Technologies: Angular Framework, TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS

UI Development: Responsive Design, Cross-browser Compatibility, Component-based Architecture, UI Optimization

Frameworks & Libraries: Angular, RxJS, Angular Material, Bootstrap

Tools: Jira, Trello, Git, Figma, VS Code, Cursor, Codex

Concepts: REST API Integration, State Management, Performance Optimization, CI/CD pipeline configurations, Reusable Components, Knowledge of testing frameworks Jasmine & Karma

PROFESSIONAL EXPERIENCE

Tradexa Technologies – Senior Frontend Developer | *Apr 2020 – Present*

- Developed and maintained **scalable Angular applications** for SaaS platforms including warehouse management systems, healthcare dashboards, and analytics/reporting tools.
- Led frontend development for **data-driven applications**, implementing complex UI components such as tables, dashboards, and dynamic forms.
- Improved application performance by reducing unnecessary API calls, optimizing change detection, and enhancing UI rendering efficiency.

- Built and optimized **Reactive Forms** for complex workflows including inventory management and healthcare data systems.
 - Collaborated closely with backend, UI/UX, and QA teams to deliver high-quality, production-ready features.
 - Supported CI/CD pipeline configuration and deployment workflows, ensuring smooth build, testing, and release processes for Angular applications.
 - Contributed to code reviews and followed best practices for scalable frontend development.
-

Katalyst Technologies – Software Developer | 2019 – 2020

- Developed responsive web applications using HTML, CSS, JavaScript, and basic exposure to Angular.
 - Worked on UI implementation based on client requirements and design specifications.
 - Collaborated with backend and QA teams to ensure seamless integration and bug-free delivery.
 - Gained hands-on experience in Agile development and team collaboration.
-

Varahi Technologies – UI Developer | 2018 – 2019

- Designed and developed **responsive web interfaces** using HTML, CSS, JavaScript.
 - Created visually appealing UI layouts aligned with user experience principles.
 - Improved cross-browser compatibility and UI consistency across multiple projects.
 - Worked closely with UI designers to translate design concepts into functional UI.
-

KEY PROJECTS

Hyper Inventory – Warehouse & Inventory Management

- Developed a **warehouse and inventory management system** as a SaaS platform for managing products and stock levels across multiple warehouses.
- Implemented **CRUD operations** for inventory entities such as products, categories, stock entries, and warehouse records.
- Built **data-driven table components** with features like pagination, sorting, and dynamic filtering for large datasets.
- Integrated **REST APIs** for seamless data communication between frontend and backend services.

- Developed **Reactive Forms** for inventory creation and updates with validations and error handling.
 - Implemented **filter-based table views** to enable quick search and data segmentation.
 - Applied **basic state management techniques** (service-based state handling) to maintain data consistency across components.
 - Created reusable and modular UI components to improve scalability and reduce development effort.
 - Optimized UI performance for handling large datasets efficiently.
-

Medvise – Healthcare Monitoring Platform

- Developed responsive dashboards for **health monitoring and data visualization**.
 - Integrated APIs for displaying patient vitals, alerts, and activity tracking.
 - Built reusable UI components for healthcare workflows and data visualization.
 - Ensured usability and accessibility for medical users.
 - Collaborated with cross-functional teams to ensure accurate and reliable data representation.
-

HyperAds – Ad Campaign Reporting

- Developed a **campaign reporting dashboard** to visualize ad performance metrics across multiple campaigns.
- **Optimized dashboard performance** by minimizing re-renders and improving data handling efficiency.
- Implemented **data-driven dashboards** with dynamic updates based on API responses.
- Integrated **REST APIs** to fetch and display campaign analytics in real time.
- Designed and developed **tabular reports** with features like pagination, sorting, and filtering for campaign data.
- Created reusable UI components for dashboards and reporting modules to ensure consistency and scalability.
- Implemented basic **state handling** to manage dashboard data across components.

EDUCATION

- MCA (Master's Degree) – Bharati Vidyapeeth University
- BCA (Bachelor's Degree) – Invertis University
- Web Development Certification – NIIT
